Seminar

March 3, 2021, 17-00, Zoom Meeting

Speaker:

Maksym Romanov

(MOM Consultant. Brighteye NV. Leen-ter Hellenstraat 1. 8850 Ardooie. Belgium.)

Topic: **Tasks of big data processing in industry**

Abstract: The report considers a typical problem of the class of applications of predictive analytics in industrial enterprises in the optimization of production planning processes. Its context, place in the hierarchy of production management processes, input data models and expected results of use are revealed. Variants of use on the example of enterprises of food (vegetable processing) industry are given.

Beginning at **17:00**
